Feb. 15, 1934. Mon.
Arrived Saranac Lake, Pa. 7 A.M.
Left Saranac Lake, Pa. 7 A.M.
Drove to St. Superior Bishop.
Waited for it on highway
and got it. Total
miles 71 M.

Met Mr. & Mrs. Bishop
at their home in Saranac Lake.
They were very kind.
Left Bishop's house about 1 P.M.
Met Mr. & Mrs. Bishop
again at their home in Saranac Lake.
Left Bishop's house about 1 P.M.
Met Mr. & Mrs. Bishop
again at their home in Saranac Lake.
Left Bishop's house about 1 P.M.

Jan. 18, 1934 - Thurs.
Trip with Verney and
Burrill up snow.
Main species found:
Sugar maple
O.T.W.
Black cherry
Bemlock
Chestnut
Tilia
F. C. Oak
Maple
White oak
Ratswood

Jan. 16, 1934 - Tue.
Having particular areas in
mind I decided to visit
them. First visited
cutting off squirrel in
the hills west of town.
Then visited the hills east of town.
Left about 9:30 with Verney,
and Burrill, and
arrived at 11:30 near Lake
George. Saw a red squirrel
there a cache of beech nuts
had been visited and
there was a good supply
of beech nuts available.
In fact most of nut trees
had been visited and
there was a good supply
of beech nuts available.
Left about 1 P.M. and
arrived at Lake George.
Left about 1 P.M. and
arrived at Lake George.
Left about 1 P.M. and
arrived at Lake George.

Jan. 19, 1934
Trip with Supervisor Bishop
and Clerk, Supervisor Verney
through the Adirondack
part of the Adirondack and
down to Lake of the Woods,
Pastel Valley through
extensive areas logged
burned and growing up to
pin cherry, aspen and
blackberry and there by
good deer range, as shown
by tracks.
Examined overhanging
Rock Well Creek.
Left Warren Gap
at 11:30 A.M.

Jan. 17, 1934 - Wed.
Left Saranac Lake in snow
and reached Johnson
at 11:30 A.M. at 7:45,
met Bill Wheeler of St. Superior
Indians and we were
piloted to an area adjoining
the road of Indians.
Noted signs of a good many
deer tracks and grouse.
Saw one deer and flushed
a ruffed.
Dove resting in snow in
places opposite for
breakfast, in other places
in snow and then game
observation.
Retired 7 P.M.

Jan. 20 - Sat.
Arrived Washington,
Pa. 8:37 A.M.

Feb. 12, 1934
Left Saranac Lake, 6:25 P.M.
Arrived Saranac Lake, 6:25 P.M.
Day with snow as follows:
Just snow covered in depth of
from a few inches. Perhaps 2 ft. at
Saranac Lake. Met Mr. & Mrs.
Giant P. Victor Ray Burmister,

Feb. 16
Left Saranac Lake with Burmister
about 11:30. Stopped for lunch
at Malone, near Saranac Lake
to look at two animals reported
to have been shot & made out
of Malone. The number of
these animals is light
which is good as
was trapped near the farm
The largest animal has been
quashed. Was surprised concerning
the appearance of the animals
which had been taken.

Feb. 16
especially on the north and
lows. Large animal was taken
at 9, about 6 miles west
of Ingram Pond. We continued
by auto from Saranac Lake
about 6 1/2 miles to Owl Head
where we got a sled and
team and drove about 6 miles
to Ingram Pond we stopped
at a very comfortable
camp.

Animal out to Anthony Hill
before sun rose about 4 miles
northeast of Ingram Pond.
3 1/2 miles from Saranac Lake,
about 10 miles from Owl Head
just zero at Owl Head where
we changed to sled.

Feb. 17, 1934 - Sun.
3° below zero this morning,
but warmed up to 40° above
in afternoon. Burmister &
I made a short trip but
saw nothing of very special
interest. Noted fox and grouse
tracks. Saw where grouse had
rested in the snow. Also
tracks of snow shoe rabbits.
Also noted trails of mink
which in places had
run through snow.

Feb. 18, 1934 - Mon.
Made a trip with Harriman
into hills about 3 1/2 miles from
Pond to see where deer yard in
dove young fawns. Saw
where fawns are visiting
carcasses of deer. Saw this

Feb. 18 con. Sunday
deer, but snow too deep for
deer to move much. We went
out on snow shoes. Saw
numerous tracks of snow shoe
rabbits and foxes.

This general region has been
enough and the second
growth is largely hardwoods
but some spruce and balsam.
Hardwoods hard maple, birch,
and black birch thick in places.
Weather much warmer and
clear today. About 10 above
early this morning and 40 above
in afternoon.

Snow no more than 3 ft. deep.

Feb. 19, 1934 - Tues. Ingram
Pond.

About 30° above zero
this morning. Snowed on
gave place to early fall
day. Made trip in afternoon
with Burmister about
3 1/2 miles round trip on
snow shoes, but did
not see much. flushed
2 grouse that were sitting
in snow in open forest.
About 10° above when we
got in.

Animal out to Johnson
and examined by Joseph
was followed by Willard
W. BB a farm boy near
St. Lawrence about 13 miles
north of Ingram Pond and

Feb. 19 con.
near Canadian line.
Temperature dropped in
evening to below zero.
Feb. 20,
Still offitting snow. Temp.
9 1/2° above at 7 a.m.
Commenced little out
Debt came out to camp,
arrived about 10 A.M.
Retired by sled to Owl's
Head leaving camp about
2 P.M. and driving about
3:30 P.M. A ride through
timber heavily draped
snow, 150 feet when we
arrived at Owl's Head.
Met Mr. Willard at Owl's Head
and Osborne, Burmister

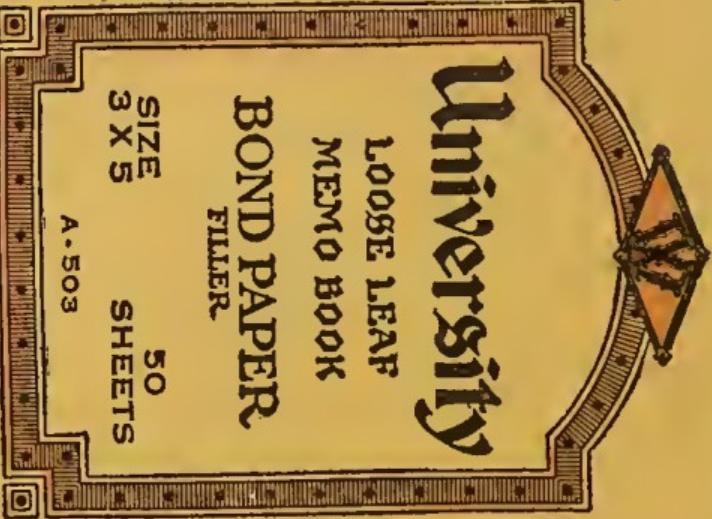

Feb. 20
and I drove to Malone
where we attended a
sportswoman meeting. After
meeting we continued to
Saranac Lake.

Feb. 21, Saranac Lake
to John Burmister and
return.
Burmister took me to
Burmister's place near lake
Champlain and saw
Apples. Retired late in
evening.

Feb. 22.
With Burmister most of day -
went to see Johnson near
Lake Placid in morning and
in afternoon the farm.
Forgot gun without 50
meters. Left in evening at
9:45 for N.Y.

Feb. 23
Arrived in N.Y. 7:29 A.M.,
most of day of Am. Mus.,
left for Washington 4:10 P.M.
arrived Wash. 7:12 P.M.

Sept. 9
Lake Superior to Ely, Minn.

Spent morning in fishing -
roasted but not a pot.

Roasted over woods.

Retired in afternoon to Ely,

coming again this evening

forages.

Sept. 11

Camped Isabella to Isabella

Isabella (downstream in swamp)

In swamp

In afternoon island
spoke swamp with
Isabella trail. Old birch
100 ft. from lake & dragon
Ridge 6 ft. up and
other species.

Sept. 11 con.

Balsam poplar -
seen to come out by
natives as shown by
some remains found
by a man who bought
skins and took them out
by plane direct to Chicago
and other points. Beavers
are taken by illegal trapping
and by dynamiting of houses
after house goes off.

Visited various points
of general interest, noting
geologic conditions within
a few miles of Isabella
camp where we stop
on night. Meals at G.C. camp.

For Grizzly - Principal

trap is of mink and

goats according to Suff.

Goldmoss - a few seen

on Four-mile lake.

Sept. 12 con.

Gros Ventre - The very
large game refuge is

inaccessible and few hunters

would enter it in most

places. Much of it is not

very favorable

Duck - Said to come out
on north shore of Lake Superior

in spring when it warms up

sooner than in farther

parts.

Swamp - Bull moose

traveled road to S.

Sept. 12 con.

Elk - Solitary - seen near
Isabella camp.

Stream improvement, levers

River near Four-mile lake,
rather elaborate narrowing

of stream by moving much

rock, building shaded

overhangs and by putting in

timber cut out to direct

current forming waterfall.

This speeds up stream,
probably cooling waters,
and by deepening the water
makes better conditions for

trout

Sept. 12 con.

Beavers. Camp Suff. & J.
Meeker says extensive poaching
is done by some Indians to
sell to a man who bought
skins and took them out
by plane direct to Chicago
and other points. Beavers
are taken by illegal trapping
and by dynamiting of houses
after house goes off.

For Grizzly - Principal
trap is of mink and
goats according to Suff.

Goldmoss - a few seen
on Four-mile lake.

Sept. 13 con.

Gros Ventre - The very
large game refuge is

inaccessible and few hunters

would enter it in most

places. Much of it is not

very favorable

Duck - Said to come out
on north shore of Lake Superior

in spring when it warms up

sooner than in farther

parts.

Swamp - Bull moose

traveled road to S.

Sept. 13 con.

Sawbill Camp to near
Hungry Jack lake & return

Moose traps - A few
in winter & some in

Mark lake - 1 P.M.
OHC Ice Suff. 3 P.M.

Harbor Point, 1 P.M.

Gasoline - 1 P.M.

Trip on sleds about 50

to Lodge near Hungry Jack

Lake and return.

Way was through country

of somewhat different
character than Isabella
camp. Many lakes but
less rock bound. General
area glacial drift with

low rocky hills rising

Sept. 14 con.

above the general level.
The lakes with timber close
to shores, but marsh in
some affording good
feeding grounds for
moose, but deer sign
not so plentiful as
on other trails.

La Brule Bear - We ran
through a part of a
an area said to be about
5000 A. Burned in 1929.
Principal reproduction
comes with coniferous
trees, with some hazel
and cherry hazel nut
and small quantities of
mixed stuff. Not very
good for game.

Moose - Near Four-mile
lake, said to be about
No. 1000 feet Hill which
overlooks La Brule lake
bordered by good moose
marshes. Moose can be
seen here from the top
of frequency, occasional at a few points
of the trail.

Sept. 14 con.

Sawbill Camp to Good
Harbor Camp, to Grand
Merrill.

Beaver poaching - Harmon
says most of it in spring

about the time snow is
going off.

Fisher - A few left but
not generally trapped
by men who locate an
animal and follow it
until it makes a kill

in it is not difficult
to trap.

Mink & Fox - Trapped
mostly during winter.

Sept. 15 con.

a checking point on

numbers.

Coys. Some seem of
superior trout in more open
parts.

Moose - Said to be
poached upon and it is
doubtful whether
meriting - Season closed
about 10 years ago

Sept. 16 (Sun)
At Lehigh - Wausau

Dr. R. C. Trippence and I
spent the day fishing.
I caught 3 northern pike
and in the afternoon we
crossed to the Canadian
side of Lake Superior
where I obtained a license
and caught 5 - my limit
of lake trout.

(Superior) which
The lake has rocky shores
and much like gave an
appearance of Lake Superior,
but instead of a jack
pine forest the balsam
is a mixture of both.
June, Norway pine, spruce

Sept. 16 (Mon)
Spent a day at home
with an addition to
my income. The money
was given to go to
Superior.

Sept. 17 (Tue)

At Lehigh & Duluth
Spent the day at the
University of Minnesota
and the University of
Minnesota. Worked
on my thesis.

Sept. 18
Duluth to St. Paul
Off 8:30 am, am. 6 PM

Sept. 19
Left St. Paul

Went out in car
to area along west side of
Lake Winona, south and
Sugar Lake. Captain who
me down said to offend
quail. An eagle
had some tail.

Visited and examined
areas where small dams
have created to hold back
water.

Drove in afternoon to
St. Paul having tears take
250 ft. a t average 8:30

Sept. 19
Duluth & Winona
Lake.

Explored areas on Lehigh
River.

Sept. 20 (Sat)

In St. Paul,

Went out to University for
an interview and received
mail and conferred with
Dr. Raphael Zim and Dr.
King of the University.

In afternoon worked in
room on correspondence.

Sept. 20
At Lehigh & Duluth
in view of the low
level lake where Indians
were shot 2 miles.

Winona

Rain gradually from
12 to 18 ft. last year.
Dams will oblige
flood to overflow a
few miles taking off
overflow through gash
at bottom.

9 ft channel
6 ft. channel now

To
Felix S. Burd
Fathers Record
man in the D.P.
It will open up.

Beach usage & water
sewer. Action by
federal.
